Administration

SPACE-SAVING AND SAFE STORAGE OF PATIENT MEDICAL RECORDS

The Customer

The district hospital in Günzburg is a modern and highly productive hospital specialised in the treatment of neurological and psychiatric disorders. Around 15,000 patients are treated at the Günzburg district hospital every year. The hospital is committed to promoting the highest standards both in medical technology and in hospital organisation. The high quality standards also apply to the management of patient medical records.

1

Task definition

The administration of the district hospital in Günzburg wanted to replace its existing patient record archiving system. In Germany medical records must generally be kept for a period of 30 years. The goal had been to find an automated, space-saving solution that would make the most of the available space because as many as 3,500 new medical records have to be filed each year. The task was also to provide fast access and maximum safety.

2

Solution

Due to space limitations and the challenge to provide a safe, ergonomic and effective solution, the management of the district hospital in Günzburg decided in favour of a Lektriever by Kardex Remstar, a vertical carousel that is optimally suited for the archiving of frequently accessed files and documents. The machine was positioned next to a computer so it can be controlled via pc at a later time, if required. The patient medical records are kept in hanging files which can be easily accessed and removed from the machine at the simple push of a button.

4

Advantages at a glance

- Fast, ergonomic and safe access to patient medical records
- Extremely space-saving:
44 meters of filing systems can be stored on a footprint of only 2.73 m
- Maximum usage of the available room height of 3.1 m
- Unit can be locked

3

Process description

We would be delighted to explain the different processes in detail in a personal consultation.

5

Scope of supply

- Lektriever SYS 115 by Kardex Remstar:
2,947 x 925 x 3,100 mm (W x D x H)
- Accessories: 17 carriers with a width of 2,587 mm for hanging filing systems
